

Hi-Range Bottle Jacks

Hi-Range models provide up to 33% more lifting height over standard hydraulic models. Hi-Range models also feature larger rams, larger bases and larger pumps than the comparable standard model.

The intended use of all these models is for heavy-duty trucks, farm equipment, building construction, mobile home set-up, and as original equipment for manufacturers of many products. All units are furnished with a two-piece 21" zinc-plated handle.
