

Low Profile Bottle Jacks 12 & 20 Ton Capacity

Intended Use: Heavy-duty, professional quality, 100% USA made hydraulic bottle/ hand jacks built for service under constant use and durable enough to last a lifetime. For low clearance vehicles, farm equipment, building construction, emergency vehicles, and/ or in conjunction with original equipment manufacturers of various products.

Features:

- Heavy-duty 65-45-12 ductile iron castings for both the base and head cap of each model.
- Steel ram & pump piston are finished with black nitride to prevent and protect against rust.
- Machined base castings have smooth surfaces and tight tolerances to increase longevity.
- Large base provides wide stance and positive load support.
- 50% safety overload factor per ASME/ PASE hydraulic bottle jack standards.
- Safety fluid bypass system prevents the user from overloading/ damaging the jack so it cannot be used beyond the ASME/ PASE load-limiting standard.
- Ram stop ring prevents ram from being overextended.
- Two (2) piece (21" Long) zinc plated handle set.
