

## Release and Handle Options All Bottle/ Hand & Long Ram Jacks

### Features:

- All hydraulic bottle/ hand & long ram jacks/ power units have the option for either a single (1) piece or two (2) piece release and are interchangeable with the simple addition or subtraction of one (1) ball in the release valve line.
- The two (2) piece release comes standard with almost all long ram jack/ power unit models and provides the user with more control over the ram's rate of descent.
- Electroless nickel plated two (2) piece release prevents and protects against rust.
- Zinc phosphated single (1) piece release prevents and protects against rust.
- High Quality and durable polyurethane seals.
- One (1) piece (20" Long), two (2) piece (21" Long), and three (3) piece (31" Long) handle sets all are zinc plated to prevent protect against rust and corrosion.

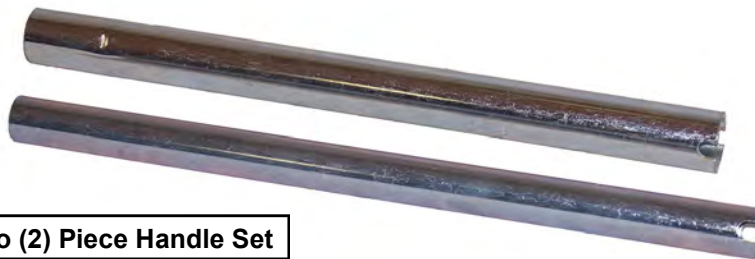

**P - One (1) Piece Release**

**2P - Two (2) Piece Release**
